Messaging		
All protocols	●	●
Auditing	●	●
Message repository - store & forward	●	●
Message Bank (archival)	●	●
Message repository - data mining	○	●
FHIR resource repository	○	●
Interface Engineer Tooling		
Graphical toolset (schema editor, production editor, debugger)	●	●
Pre-built transforms	●	●
Ability to write custom transforms	●	●
Managed File Transfer	●	●
Human workflow and business process orchestration	●	●
Java Business Hosts	●	●
"Interface Schema Inference" Toolkit	●	●
Operations		
Containerized / Cloud & Hybrid	●	●
Horizontal data scaling (sharding)	○	●
Database Management		
Building schema in SQL, DocDB or NoSQL	○	●
Creating Stored procedures or custom Indices	○	●
Application Development		
Language Bindings used to write client applications	○	●
Language Gateways for calling external applications	○	●
API Management		
Consume API with throttle, meter, analyze capabilities	●	●
Publish API with throttle, meter, analyze capabilities	●	●
Full API Lifecycle management	●	●
Advanced Analytics		
Native dashboards: Message-level	●	●
Native dashboards: Data Mining	○	●
Native NLP	○	●
UIMA integration	○	●
Spark Connector + AI enablement	○	●
Self-service BI connectors	○	●
